

Generation 79 **300nodes**
20apps

The scatter plot for Generation 79 displays the distribution of placement times for 300 nodes and 20 applications. The x-axis represents placement_time (ms) from 0 to 12. The y-axis is unlabeled. Data points are colored orange and blue. A red 'x' is located at approximately (0.5, 4.5). A black star is located at approximately (6.0, 2.5). The data shows a high density of points at low placement times (near 0 ms) and a long tail extending to 12 ms.
