

Generation 36

50nodes
20apps

The scatter plot displays fitness values for 50 nodes and 20 apps across different generations. The x-axis represents the number of nodes (from 1 to 50), and the y-axis represents the fitness value (from 0.00 to 0.10). The data points are colored blue for 50 nodes and orange for 20 apps. A red 'x' marks the point for 20 nodes, and a black star marks the point for 50 nodes. The fitness values generally decrease as the number of nodes increases, with a notable drop around 20 nodes.
