

Generation 44

**50nodes
20apps**

The scatter plot displays fitness values on the y-axis (ranging from 0.0 to 1.0) against an unlabeled x-axis. Data points are categorized by color: blue for 50 nodes and orange for 20 apps. The plot shows a general downward trend, with fitness decreasing as the x-axis value increases. A red 'x' marks a data point at approximately (10, 0.95). A black star marks a data point at approximately (15, 0.65).
