

Generation 84

50nodes
20apps

The scatter plot displays the relationship between the number of nodes (x-axis) and the number of applications (y-axis) for Generation 84. The data points are categorized into two series: blue circles and orange circles. A red 'x' marks a specific point, and a black star marks another point. The plot shows a downward trend, indicating that as the number of nodes increases, the number of applications tends to decrease.
